Office space situated in a smaller office/industrial building from the 70's. Ceiling height is over 3m. In this stage, space is most suitable for a storage, studio or combination of parking space and offices. If the number and size of the windows is to be increased, more light would be provided, so the space could also be used for diversity of business activities. Primarily suitable for companies who prefer industrial or retro style, which could be adapted according to need, considering that it is built based on the supporting pillars principle. Space could also be used for retail or show room purposes, as well as for storage. A number of parking spaces is surrounding the building. This type of space is rarely in the offer.
